

INTRODUCTION TO ENTERPRISE RISK MANAGEMENT

ABOUT THE AUTHOR

Dr. N. Krishnamurthy, known as 'Prof Krishna' to his students and colleagues, completes 56 years of teaching and training, research and consultancy at universities, and for Government and private agencies in USA, India, and Singapore.

He received BSc and BE(Civil) degrees from India and MS(CE) and PhD from USA. He taught in two universities in India, three in USA, and three in Singapore. He worked summers and consulted for the Oak Ridge National Lab in USA.

He has to his credit four books on his own and three co-authored, plus over a hundred papers.

Formally trained in structural engineering, Prof Krishna started on computers in the USA in 1959, and has been trying to keep up with applications. He has one book on computer graphics and uses spreadsheet extensively in his study and research.

For the last 15 years, Prof Krishna has focused exclusively on workplace safety and risk management, lecturing, conducting sponsored research, consulting, and publishing on these topics in Singapore, India and USA. He investigates workplace accidents, and appears as expert witness in court cases.

He has one invention on risk management patented in Singapore and Australia, and another related to scaffolding and formwork in the works.

More information on his recent activities may be found from his website: www.profkrishna.com
